

Digital Fusion

Rowe CD to digital conversion in 45 minutes with all the revenue earning power of the Ecast broadband network

Amusement Technologies, the masterminds who introduced Perfect Solution Kit* and The Ultimate Scan Converter**, now bring the same conversion ingenuity to Rowe CD juke. With **Digital Fusion**, operators can easily and economically transform their MM series, 2nd gen, Encore and CD 100 - 100E CD juke into digital juke powered by all the content and revenue benefits of Ecast and its all-broadband network.

Digital Fusion's ingenuity comes in its universal approach to conversion, drastically simplifying parts replacement. Simply pop out the existing Central Computer Core and replace it with the Digital Fusion CCC – the connectors all line up beautifully. Three additional connectors let you easily cable up to the Ecast MoJO™.

Digital Fusion comes in bare bones all inclusive versions to fit your pocketbook and time requirements. The Basic kit contains everything you need power up the new Ecast-powered juke while the Full Kit also includes all the finishing artwork to complete the transformation.
